

AHELP for CIAO 3.4

__get_defined_symbols

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Get the symbols defined by the preprocessor

Syntax

```
Integer_Type __get_defined_symbols ()
```

Description

The `__get_defined_symbols` function is used to get the list of all the symbols defined by the S-Lang preprocessor. It pushes each of the symbols on the stack followed by the number of items pushed.
