AHELP for CIAO 3.4

chown

Context: slangrtl

Jump to: Description See Also

Synopsis

Change the owner of a file

Syntax

```
Integer_Type chown (String_Type file, Integer_Type uid, Integer_Type
gid)
```

Description

The chown function is used to change the user−id and group−id of file to uid and gid, respectively. It returns zero upon success and −1 upon failure, with errno set accordingly.

On most systems, only the super user can change the ownership of a file.

Some systems do not support this function.
