Chandra X-ray Center

AHELP for CIAO 3.4   **close**   Context: sherpa

Jump to: Description Example Bugs See Also

Synopsis

Closes the image display window.

Syntax

```
sherpa> CLOSE IMAGE

where IMAGE is the imaging window (see the IMAGE command.)
```

Description

Note: Image display windows, as well as plotting display windows, may be closed simply by closing the window with a mouse click.

See the Sherpa Chapter for further information regarding data display capabilities within Sherpa.

Example

Open and close the imaging window:

```
sherpa> OPEN IMAGE
sherpa> CLOSE IMAGE
```

Bugs

See the Sherpa bug pages online for an up−to−date listing of known bugs.
