

*AHELP for CIAO 3.4*

get_models

Context: [sherpa](#)

Jump to: [Description](#) [Example](#) [Bugs](#) [See Also](#)

Synopsis

Module functions that return lists of available source and instrument models

Syntax

```
Array_Type get_models([String_Type])
Array_Type get_inst_models([String_Type])

Error Return Value: NULL

Argument:

(1) matching string (default none: get all model names)
```

Description

Returns a string array containing the names of all appropriate Sherpa source or instrument models. (This includes XSPEC models and user-defined models.) If a string argument is provided (e.g., "xs"), only those models whose names contain matching substrings will be returned. Beware of case-sensitivity: upper-case matching strings will yield a NULL return.

Example

List all models with psf in their names.

```
sherpa> psfmods = get_inst_models("psf")
sherpa> printarr(psfmods)
fpsf1d
fpsf2d
tpsf1d
tpsf2d
```

Bugs

See the [Sherpa bug pages](#) online for an up-to-date listing of known bugs.
