AHELP for CIAO 3.4

## rmdir

Context: [slangrtl](#)

*Jump to:* [Description](#) [See Also](#)

---

## Synopsis

Remove a directory

## Syntax

```
Integer_Type rmdir (String_Type dir)
```

## Description

The rmdir function deletes a specified directory. It returns 0 upon success or -1 upon error and sets errno accordingly.

The directory must be empty before it can be removed.
