

AHELP for CIAO 3.4

xpa_version

Context: [xpa](#)

Jump to: [Description](#) [See Also](#)

Synopsis

The version of the XPA library being used by the S–Lang module.

Syntax

```
Float_Type xpa_version
```

Description

This read–only variable contains the version of the XPA library being used by the S–Lang XPA module. The `_slxpa_version` variable gives the version number of the S–Lang module.
