AHELP for CIAO 3.4 XSPWab Context: sherpa

Jump to: Description Bugs See Also

# **Synopsis**

An extension of partial covering fraction absorption into a power–law distribution of covering fraction. XSpec model.

# **Description**

An extension of partial covering fraction absorption into a power–law distribution of covering fraction as a function of column density, built from the wabs code.

The reference for this model is Done & Magdziarz 1998 (MNRAS, 298, 737).

### xspwab Parameters

Number	Name	Description
1	nHmin	minimum equivalent hydrogen column (in units of 1e22 atoms/cm2)
2	nHmax	maximum equivalent hydrogen column (in units of 1e22 atoms/cm2)
3	beta	power law index for covering fraction

This information is taken from the <u>XSpec User's Guide</u>. Version 11.3.1 of the XSpec models is supplied with CIAO 3.2.

### **Bugs**

For a list of known bugs and issues with the XSPEC models, please visit the XSPEC bugs page.
