Last modified: 4 February 2008

## **Bugs: rmfimg**

## **Bugs**

1. Requires a uniformly-gridded RMF

The output from <a href="mkrmf">mkrmf</a> works correctly as input to <a href="mkrmf">rmfimg</a>.

2. Block names containing blank spaces are treated as bad syntax

If the extension in the input file name has a space in it, the tool will fail. This example uses a Con–X RMF:

```
unix% rmfimg "conx-ea-101106-b10.rsp[SPECRESP MATRIX]" rsp.img
# (CIAO 4.0): Failed to open conx-ea-101106-b10.rsp[SPECRESP MATRIX]:
Must have RMF file
```

## Workaround:

Refer to the block by number instead of name, e.g. "conx-ea-101106-b10.rsp[3]".

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
