

Download ATOMDB 1.3.1

Go to: [Download Index](#) | [Solaris](#) | [Linux 6](#) | [Linux 8](#) | [OS X PowerPC](#) | [OS X Intel](#) | [CALDB](#)

Latest Update: 3 July 2003

The atomic database ATOMDB is a combination of the Astrophysical Plasma Emission Database ([APED](#)) and the spectral models output from the Astrophysical Plasma Emission Code ([APEC](#)). The ATOMDB is used by [GUIDE](#) and [ISIS](#) to identify emission lines and to calculate spectra. For more information, visit the [ATOMDB Home Page](#).

Contents	File	Size
Full Release	atomdb.tar.gz	21 MB; 145 MB uncompressed
Installation Instructions	ATOMDB installation page	

The Chandra X–Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
