

---

## What ACIS gain file was used in the automatic processing?

---

The name of the gain file used in processing can be found in the header of the level 1 event file for grating observations and of both the level 1 or level 2 for imaging observations:

```
unix% dmkeypar acisf01843N001_evt2.fits gainfile echo+  
/data/CALDB/data/chandra/acis/bcf/gain/acisD2000-01-29gainN0001.fits
```

---

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
