

AHELP for CIAO 3.4

__push_args

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Remove n function arguments onto the stack

Syntax

```
__push_args (Struct_Type args);
```

Description

This function together with the companion function `__pop_args` is useful for passing the arguments of one function to another. See the description of `__pop_args` for more information.
