

AHELP for CIAO 3.4

byte_compile_file

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Compile a file to byte-code for faster loading.

Syntax

```
byte_compile_file (String_Type file, Integer_Type method)
```

Description

The `byte_compile_file` function byte-compiler file producing a new file with the same name except a 'c' is added to the output file name. For example, file is "site.sl", then the function produces a new file named site.slc.

The method parameter is not used in the current implementation. Its use is reserved for the future. For now, set it to 0.
