

AHELP for CIAO 3.4

get_import_module_path

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Get the search path for dynamically loadable objects

Syntax

```
String_Type get_import_module_path ( )
```

Description

The `get_import_module_path` may be used to get the search path for dynamically shared objects. Such objects may be made accessible to the application via the `import` function.
