AHELP for CIAO 3.4

rename

Context: slangrtl

Jump to: Description See Also

Synopsis

Rename a file

Syntax

```
Integer_Type rename (String_Type old, String_Type new)
```

Description

The rename function renames a file from old to new moving it between directories if necessary. This function may fail if the directories do not refer to the same file system. It returns 0 upon success, or −1 upon error and sets errno accordingly.
