AHELP for CIAO 3.4

strup

Context: slangrtl

Jump to: Description Example See Also

Synopsis

Convert a string to uppercase

Syntax

```
String_Type strup (String_Type s)
```

Description

The strup function takes a string s and returns another string identical to s except that all lower case characters that comprise s will be converted to upper case.

Example

The function

```
define Strcmp (a, b)
{
  return strcmp (strup (a), strup (b));
}
```

performs a case−insensitive comparison operation of two strings by converting them to upper case first.
