

Instrument Model Bugs: tpsf

Bugs

1. *Instantiating a TPSF model and writing out its amplitudes can cause output to STDOUT to cease.*

This is not a case of verbosity being reset to zero. The root cause is unknown.

```
sherpa> tpsf2d[t]
sherpa> instrument = t
sherpa> write t
...
sherpa> fit           # does not run, no output
sherpa> quit         # Goodbye is NOT echoed to the screen
unix%
```
